How to score

- At the end of each round, every player counts the pips left in their hand.
- The lowest total wins the round and scores the sum of the other players' pips, minus their own remaining total.
- A tie for the lowest total scores nothing for anyone.
- Target: **100** points with 2, or partnerships · **61** with 3 or 4.

Some groups play the simplified rule, where the round winner simply takes the total of everyone else's pips without subtracting their own. Both are widely played and they differ only on a blocked round — agree which one you are using before the first deal.
